

F116 Series 2 Ductable Media Air Cleaners **Honeywell**

**Honeywell Commercial Air Products
Featuring Hepa-Flow CPZ™ Technology**

The F116 Series 2 is a custom modular system for tough commercial and light industrial indoor air cleaning

- The Three-Speed F116 Series 2 Self-Contained Ductable Commercial Air Cleaner with Remote Wall Switch removes airborne contaminants with a variety of filter configurations. These units use their own ductwork, independent of the HVAC system. Using separate ductwork helps isolate airborne particles and odors so they can be source captured and may even be used to create an "air curtain," an invisible barrier to indoor air pollution. This versatile air cleaner can be used to create positive or negative air pressure in critical areas. They also can be operated in an "unducted" mode as a stand alone air purification system.
- The solid state, Three-Speed Remote Switch allows controlling air flow and sound level. It can be mounted adjacent to the unit or on the wall for remote operation.
- The F116 Series 2 offers multiple filter options. Modularity allows you to customize an air cleaning solution. (refer to table below)

- The F116 Air Cleaner Saves Energy! The additional ductwork expense is offset by the reduced amount of outdoor air that needs to be imported, and the costly heating or cooling that outdoor air may require.

Particles aren't always the problem

Anywhere gases, odors and volatile organic compounds (VOCs) are a part of doing business – you'll want an air cleaner that includes CPZ™ sorbent media.

Depending on your particular application, we can adjust the CPZ™ formula to solve your specific need. Honeywell CPZ™ sorbent media is specifically formulated for maximum efficiency at reducing a broad range of gases-odors-VOCs.

F116 CPZ™

Applications

You will find the F116 Series 2 deployed in spaces where particle counts are typically high and odors are a part of doing business.

- Manufacturing & Factories
- Print Shops
- Auto Repair Shops
- Medical and Research Facilities
- Healthcare Facilities
- Casinos
- Spas & Salons
- Bingo Halls & Fraternal Clubs
- Gyms and Locker Rooms
- Nursing Homes
- Veterinary Clinics, Kennels
- Energy Savings Applications
- and more...
